

C & L 158

This blow-torch is especially made and priced for the man who likes to do odd jobs around the house, or to tinker with mechanical things. It will last a lifetime if it is not abused. The usual retail price is about five dollars. Most hardware, electrical and automobile accessory stores have it—or can get it for you quickly. Look for the red handle.

Whatever you need in a blow-torch you'll find in the Clayton & Lambert line

PERHAPS you use a blow-torch only once in a while. In that case you don't need a torch built for hard use on every kind of a job, every day and all day. And you don't need to pay the higher price, either. Not when you can buy the new Clayton & Lambert 158.

It's a low-priced blow-torch, but we don't know where you can buy a better blow-torch at any price, outside of the Clayton & Lambert line. It's husky, with a strong, thick base that protects the tank. Everything in it is made to exacting precision standards, so that it works right—and keeps on working right as long as it is not abused. It holds its compression. And it gives you a hot flame in a jiffy.

On the other hand, if you do use a blow-torch in your daily work, we believe you'll find the Clayton & Lambert 32

better suited to your needs. For in addition to the excellent qualities of the 158, it has the new, patented Clayton & Lambert gas orifice. That orifice is made to the exact size for perfect operation. And it cannot be spread and enlarged by the needle-valve. Nor can it clog; every time you turn the torch off, the needle-valve cleans the orifice.

Blow-torch users have made the Clayton & Lambert line the most popular in the world. Hardware, electrical and supply houses sell these Clayton & Lambert blow-torches — you can identify them easily by the *red handle*.

CLAYTON & LAMBERT

MANUFACTURING CO.

Power

"YANKEE" No. 90 Screw-driver is made for the man with *power* in his grip . . . Made for all men who use a screw-driver as an all-purpose tool and depend on it to take all sorts of punishment.

"Yankee" No. 95, a lighter screw-driver, has the same dependability in finer work.

The handle of a "Yankee" can't loosen, wobble or turn on blade. Every "Yankee" blade is twice tested by experts and won't crack, break, twist, or bend on the edge.

• **No. 90.** Standard Style—15 sizes: 1½" to 30" blades. Price for 4", 40c; 6", 55c; 8", 75c.

• **No. 95.** Cabinet Style—11 sizes: 2½" to 15½" blades. Price for 4½", 40c; 6½", 50c; 8½", 65c.

YANKEE Vise No. 1993

Removable from base
for continuous work

Means accuracy and time-saving. Work is center-marked, then press-drilled and milled, and back to bench, without removing from vise. Block with V-shaped grooves holds rounds or irregular shapes. No. 1993, length 8¾", jaws open 3⅞"; price, \$9.90. Other sizes, from 1½" to 4" opening, at \$3.75 up.

Ask dealer for "Yankee".
Look for the name.

"YANKEE" on the tool you buy means
utmost in quality, efficiency and durability.

"YANKEE" Tool Book, free. It is filled with the kind of action pictures (ingenious tools in use) that readers of Popular Mechanics like to see. Write to—
