RADIO REPAIR

find for a *Good Blow Torch*

If you like to tinker with your motor car or radio—or to do odd jobs about the house, you will find this new C & L Everedy Blow Torch one of the most useful tools in your kit. It is astonishing how many demands you will have for it.

If you are a farmer or suburbanite—with tractors and gas engines and electric motors and other modern farm equipment to repair and service—you simply can't do the job properly without a good blow torch.

The new C & L Everedy is a *good* blow torch—the best blow torch we know how to make for general utility purposes.

For three generations Clayton & Lambert have been making blow torches and firepots. For three generations skilled mechanics the world over have

used these tools. And during all these years in the trades and in industry the Clayton & Lambert name has stood for the Standard of Quality.

Nowadays the field of usefulness for these tools has been widely extended. Every man who has machinery or electrical equipment to keep in repair—or who enjoys working with tools—finds constant need for them.

And as usual—Clayton & Lambert leads the way in supplying that need.

The new C & L Everedy Torch is designed especially for the home, workshop or farm. It is a Quality Product at a popular price—uses ordinary motor fuel—generates quickly and produces a perfect blue flame of intense heat—full quart size—seamless brass tank—made to meet every requirement of home use—and to last a lifetime.

*Your hardware dealer should have C & L tools.
If he does not, write the factory.*

Mechanics and industrial buyers will find C & L Quality Line Firepots and Torches on sale by hardware and mill supply distributors everywhere. The new catalog will be mailed on request.
