

BLOW TORCHES
C&L, GASOLINE

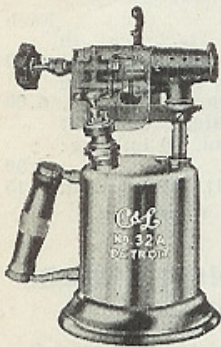

Large Powerful Two-Quart Size

Produces a ten inch blast flame which may be regulated to small size. Blunt control needle, removable jet block and detachable cleaner pin. Large automatic pump. For burning gasoline.

Each
No. 226—2 qt. cap.; wt. each 7 lbs. \$31.00

One in a box.

Standard Mechanics Grade

Generates a powerful blue flame, seven inches long which can be reduced to a small flame for light work.

Burner has blunt control needle, removable jet block and detachable cleaner pin. Generator is fully protected from wind and weather.

Heavy gauge brass tank, bottom filled; automatic pump. For burning gasoline.

Each
No. 32A—1 qt. cap.; wt. each 5 lbs. \$20.30

One in a box.

BLOW TORCHES
C&L, GASOLINE

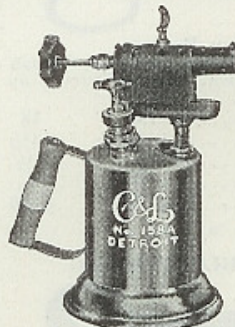

Mechanics' Medium Type

The self-cleaning burner is made with blunt control valve, removable jet block and detachable cleaner pin. Produces an excellent flame of suitable volume for ordinary work. Flame smoothly regulated from high to low.

Burner protected with a light "snap-on" windshield. Heavy gauge brass tank, bottom filled. Automatic pump. For burning gasoline.

Each
No. 144A—1 qt. cap.; wt. each 4 3/4 lbs. \$16.30

One in a box.

With Sharp Pointed Needle Burner

The bronze burner is made with a back flow super-heating vein which generates an intensely hot, well controlled, blue flame 6 1/2 inches long.

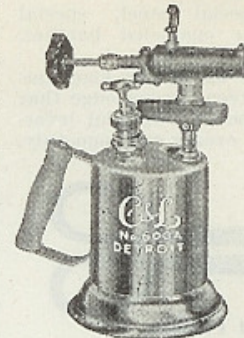

Control needle is made with a sharp point and provided with a shoulder to prevent enlargement of the orifice.

Equipped with windshield. Heavy gauge brass tank with concave bottom to serve as a funnel in filling. Quick acting automatic pump. For burning gasoline.

Each
No. 158A—1 qt. cap.; wt. each 4 3/4 lbs. \$14.70

One in a box.

BLOW TORCHES
C&L, GASOLINE

With Sharp Pointed Needle Burner

Designed for odd jobs by the occasional user.

Burner is made with a back-flow generator and it has a tapered burner tube closed at the back. Produces a good size, hot, blue flame.

The sharp pointed control needle is provided with a shoulder to resist orifice enlargement.

Heavy brass tank; bottom filler plug; automatic pump. For burning gasoline.

Each
No. 600A—1 qt. cap.; wt. each 4 1/2 lbs. \$13.50

One in a box.

Same as above except smaller burner and tank.

Each
No. 700A—1 pt. cap.; wt. each 3 3/4 lbs. \$13.50

One in a box.

Low Priced, For Occasional Use

Contains the usual safety features found in higher priced torches. Full size bronze burner with super-heating vein generates a hot, blue flame six inches long. Sharp point control needle is provided with a shoulder to prevent orifice enlargement. Cool bakelite handle; heavy gauge brass tank.

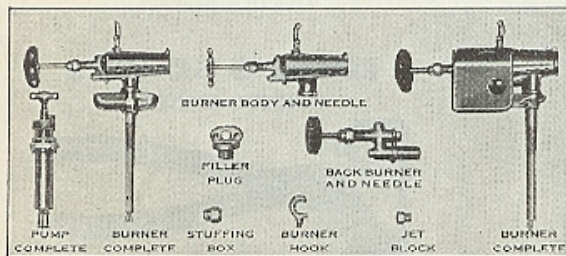

Each
No. 800—1 qt. cap.; wt. each 4 lbs. \$12.40

One in a box.

BLOW TORCH REPAIR PARTS

C&L

NOTE—In Ordering Repairs for Blow Torches be Sure to Specify Number of Torch as Well as Number and Name of Part

Miscellaneous Parts

No. 3008—Stuffing Box; fits all torches	Each	\$0.60
No. 7172—Burner Hook; fits all torches	Each	.35
Cleaner Pin and Stem—Give torch number	Each	.60
Pump Cup Leather Washer—Give torch number	Each	.15
Pump Check Valve Cork Seat—Give torch number	Each	.05
Check Valve Spring—Give torch number	Each	.05
