BURNING PAINT  
COPPER TUBING  
THAWING

Sievert torches are acknowledged the World's Best, and for over 50 years of manufacturing their one and only goal has been quality. After a very thorough test by our mechanical engineer our conclusion is "It is the peer of them all."

Tank is constructed of heavy, non-porous brass, double-gauge bottom that is lapped and brazed — no soldering whatsoever — and will withstand an inner pressure of 110 pounds. Patented safety valve in filler cap automatically releases excess pressure. ABSOLUTELY EXPLOSION-PROOF.

Special cast alloy burner (Sievert Secret) that will not burn off at the tip. Straight channel gasifier, without gauze, easy to clean.

Regulating valve with cleaning needle removes carbon in the orifice without enlarging it. Valve control produces two types of flame; one a sharp pointed flame for fine soldering, and the other a strong, intense blast for heavy soldering and brazing. TWO TORCHES IN ONE.

Will function in any weather and under all conditions. **BURNS IN ANY POSITION.**

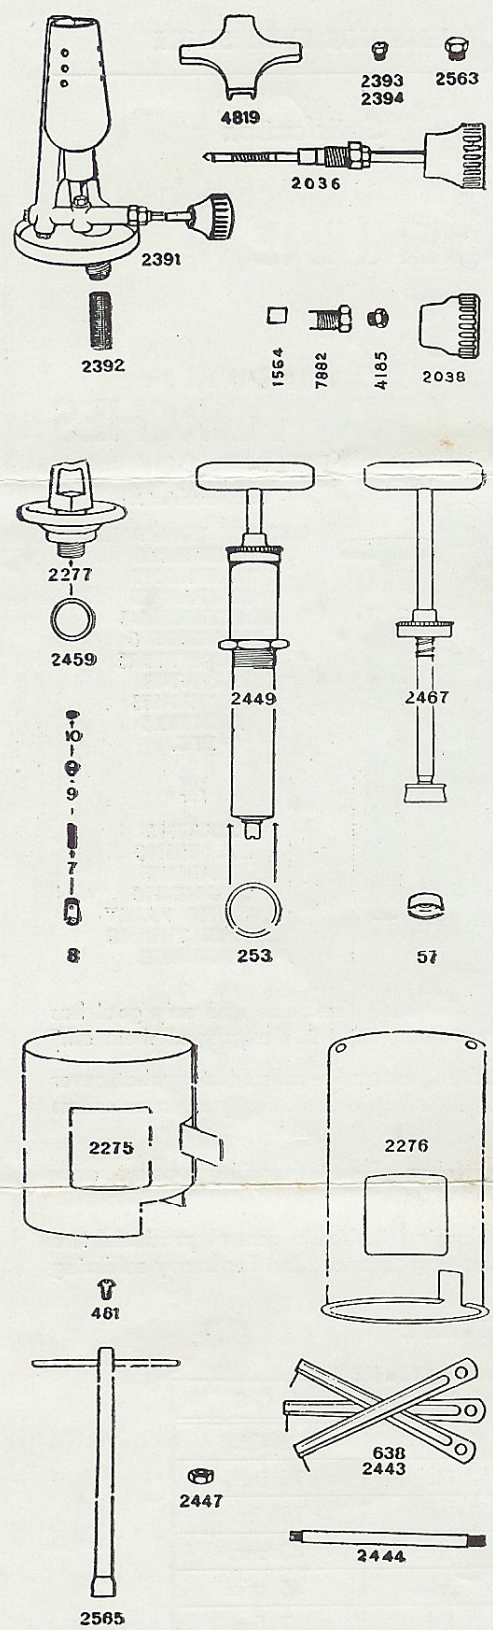

SIEVERT	# G-6	# G-7	# G-8
Capacity of Container	¾ Qt.	1 Qt.	2 Qt.
Length of Flame	8 in.	12 in.	15 in.
Diameter of Flame Tube	¾ in.	1 in.	1½ in.
Melts Copper Wire ⅜" x 2"	70 sec.	60 sec.	40 sec.
Burns at Full Flame	60 min.	45 min.	45 min.
Weight (Empty)	3 lbs.	4 lbs.	7 lbs.
<b>PRICE</b>	<b>\$9.50</b>	<b>\$12.00</b>	<b>\$18.00</b>

## SOLDERING AND MELTING FURNACES

For  
GASOLINE  
and  
KEROSENE

WINDPROOF  
STORMPROOF

### TYPE E-9 (Capacity 1 Gallon)

For Melting: **LEAD, BABBITT, TIN, PARAFFIN, TAR**

For Heating: **SOLDERING IRONS, BRANDING IRONS, RIVETS, etc.**

For Bending: **PIPE, etc.**

In actual tests the SIEVERT Fire Pot proved far superior in quality and performance to all other similar equipment. (Melts 25 pounds of solder, ready for use, in 10 minutes).

Container of double pickled sheet steel, perfectly welded. Large funnel, and air release filler cap.

Burners of bronze composition, fitted with valve to control flame. STRAIGHT CHANNEL TYPE: NO COILS: EASY TO CLEAN.

Powerful heavy gauge brass pump to insure steady, even flame.

Handle on top plate serves as support for soldering irons.

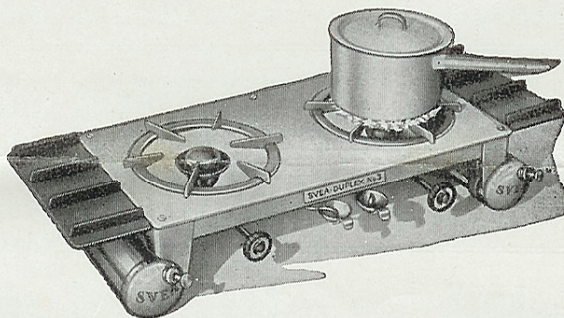

Suitable for indoor and outdoor use.

Apparatus can be converted from gasoline to kerosene, or vice versa, by simply replacing the orifice.

Price with "C" or "B" Hood, \$20.00.

Every apparatus is tested and guaranteed to give long service under the most severe working conditions.

PRICE \$18.50

## SIEVERT Paraffin Ranges (Kerosene)

### "Svea-Duplex No. 3" two burners

are equipped with

SIEVERT Svea-burner No. 1815, with knob permitting fine flame regulation or complete shut-off, also self-cleaning the nipple when valve is closed.

SIEVERT patented "measuring cup" which, when filling with spirit, automatically feeds the lighting cup with the amount of spirit required for preheating.

The range may be extended by a loose side-piece (No. 10580) nickelplated in matt finish, supplied on request.

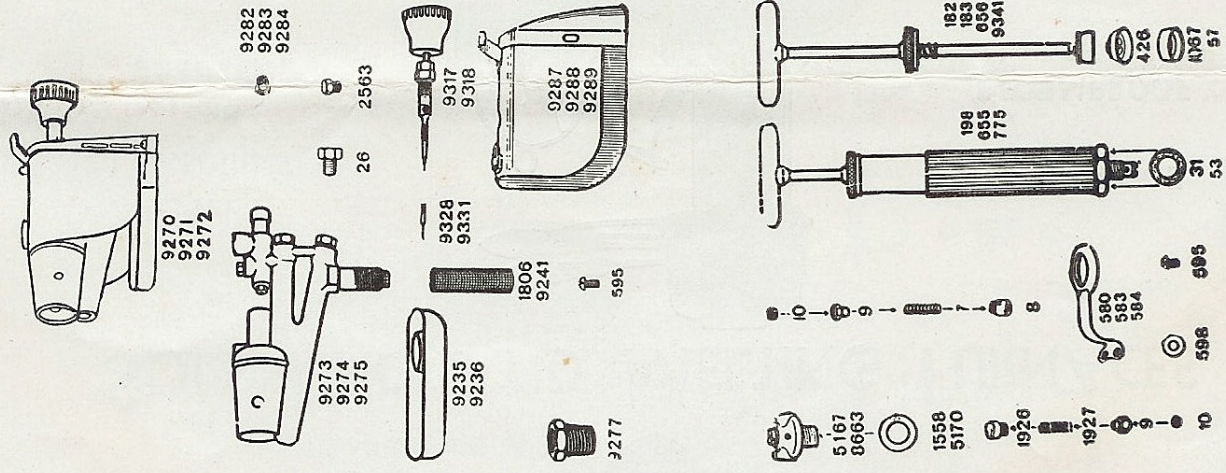

Made either in attractive green or cream enamel, or nickel-plated.
