

BLOWLAMPS

FOR PARAFFIN (KEROSENE)

Made
in England

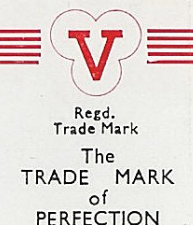

Veritas Mark I Blowlamps are made in first quality Heavy Gauge Brass, with indestructible perforated steel handles which always remain cool. The 1-pint size generates an intensely hot flame of approximately 3,000 deg. Fahr. They are unaffected by rain and wind and will burn in practically any position. Indispensable for plumbing, burning off paint, soft soldering and light brazing operations.

- P.9890 $\frac{1}{2}$ -pint capacity ... 36/- each
